ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: **BANANA RESISTANCE GENES AND USES THEREOF**

(57) Abstract: The present invention relates to pathogenic resistance. More particularly the present invention relates to polynu-
cleotide and polypeptide sequences involved in the resistance mechanism of banana plants to fungal pathogens particularly, the soil
born *Fusarium* fungi. Two banana resistance genes, RGA5 and RGA2 are isolated and characterised. The invention also relates to
the use of these sequences for modulating plant resistance and for producing genetically modified plants having modified pathogen
resistance characteristics.
